

FIVE STAR BUILDING CORP

Using IC Sentinel® to ensure compliance and safety on Healthcare construction & renovation job sites

Five Star Building Corp is a full-service construction management and general contracting firm, which specializes in education, healthcare, commercial, industrial and historic restoration projects. Five Star wins return clients with its veteran staff, creative solutions, and commitment to speed and efficiency while maintaining top quality. Another top priority for Five Star is job site safety – not only for staff and workers, but also for the occupants of the buildings they work on.

THE EXTRA MILE

Anterooms and tack mats are common safety precautions in healthcare environments, but Five Star goes a step further. By employing IC Sentinel® units, Five Star is able to monitor air quality in real time, as well as generate reports on particle count, differential room pressure, air quality, humidity, temperature, and sound and light levels.

IC Sentinel ensures compliance with ICRA, as well as any state & local requirements that may apply to a particular job site. This extra protection not only helps them win healthcare projects, but also protects against negligence claims in the event that an incident does occur.

TO VERIFY AND PROTECT

While healthcare construction sites may seem like the most important targets for compliance, Five Star has also utilized IC Sentinel® at university medical research laboratory construction sites and metropolitan airport construction sites. With IC Sentinel®, they are able to verify 24/7 that they maintain negative pressure inside construction areas, compliance to IAQ particulate levels, both inside and adjacent to construction, as well as normal levels of particulates and noise in sensitive nearby occupied areas. For added piece of mind, Five Star is able to grant permission to their customer to view the IC Sentinel system and monitor IAQ in real time, as well as provide compliance reports and other metrics on request.

“We're 100% committed to creating a safe job site. We feel that using IC Sentinel keeps us on the cutting edge of technology and infection control, and puts us a step ahead of other construction firms out there.” - Kevin Perrier, President
Five Star
